

Artist: Thord Mellgren of Hova, Sweden

Design: This fan bird dove is constructed with four-pieces-of-wood. The bird's body is one carved piece of wood. The tail and each wing are the other three pieces that are inserted into the body. All three of the fans are double-interlocked. The wings have three v-scorp cuts between the interlocks whereas the tail has one. It makes for a nice contrast while following through with the design.

Timber: aspen

Artist: Thord Mellgren of Hova, Sweden. (note: This bird was given to us ... believed to be of german origin. However, we found an old postcard with this exact design of Thord Mellgren).

Design: This unique fan bird is a very old style. The double-interlock with a v-scorp cut in-between gives extra detail. It is interlocked to have a split tail which is not common today.

Timber: unknown
